

Approval list of combustion products

This is an alphabetical list of the current homologations of our combustion products.

However it is not a substitute for neither the order list "Burner Accessoires" nor any information given by specific "Sales Actions".

Some controls which have been approved but have not been produced yet may appear on the list, others may not be installed in every country.

The items on the list are subject to change.

Particular details can be provided upon request, the list can be arranged in various manners to meet specific needs.

Moreover, a set of several national homologation certificates administrated by local market areas are available.

Sensors and detectors are functional components of the respective controls. Their combination has been assessed as outlined in the relevant data sheets.

Therefore, they have not been listed separately.

Approbationen der Produkte für die Brennerausrüstung

Ihnen liegt hier ein alphabetisches Verzeichnis der gültigen Zulassungen unserer Brennerkomponenten vor.

Es ist durchaus möglich, daß diese Übersicht Produkte enthält, die nicht produziert werden oder nicht in allen Ländern eingesetzt werden dürfen.

Sie ersetzt daher weder die Liste "Brenner-/Kesselzubehör", noch soll sie speziellen Verkaufsbedingungen ("Sales Actions") vorgreifen.

Die Eintragungen unterliegen einem stetigen Wandel.

Details zu den Approbationen können jederzeit angefragt werden. Auf Wunsch können wir Ihnen auch unterschiedliche Anordnungen aufbereiten.

Über die vorliegende Aufreihung hinaus sind nationale Zulassungen, die von den lokalen Marktbereichen verwaltet werden, verfügbar.

Flammenfühler und andere Sensoren sind (funktionale) Bestandteile der entsprechenden Regel- und Steuergeräte, die grundsätzlich als Einheit geprüft werden gemäß unserer technischen Dokumentation.

Fühler werden deshalb hier nicht separat erwähnt.
